## Projects

### Orgblog

Developer

<https://github.com/ctindall/orgblog>  
A Python Flask server to serve a website based on Emacs org-mode files. Includes org-mode file format parser written from scratch.

### Really Big Day

Creator/Developer

<https://reallybigday.com/>  
Did 100% of front-end design (jQuery, Bootstrap), backend programming in PHP, as well as the individual wedding pages.

### Lunch Warrior

Creator/Developer

<https://lunchwarrior.com/>  
A site I built to help me plan make-ahead sack lunches for myself and my wife (and anyone else who wants to use it). Was a learning experience for using jQuery and Bootstrap.

### Yance-Man

Creator

<http://github.com/ctindall/yance-man>  
A simple Jekyll template and makefile for creating an easily-maintainable resume site.

### Tabcast

Developer

<https://github.com/ctindall/tabcast>  
A small podcatcher utility in Ruby.

### Billipede.net

Writer

<http://billipede.net>  
A mostly-technical blog.
